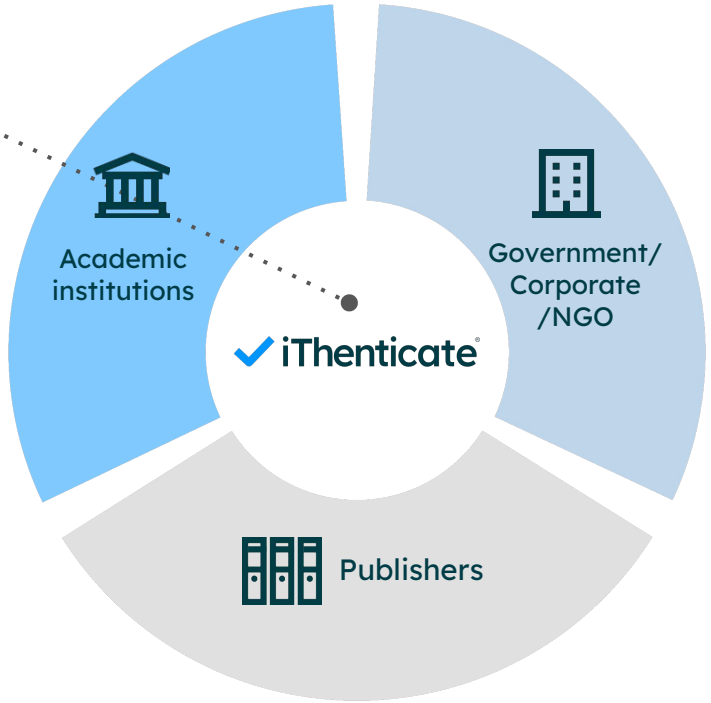
Publish with confidence



Protecting

institutional and researcher reputations by making sure that created content is accepted and published free from the damage un-original work brings.

Connecting

researchers to the publishing process so they can publish with confidence.

Evaluating

documents in a scalable and systematic way making it easy to incorporate plagiarism checking and AI writing detection into every organisation.

Feedback Studio vs iThenticate

turnitin

feedback studio

- **More future innovations, product enhancements and integrations**
- **Feedback & grading:** annotations tools, bubble & voice comments, QuickMarks, rubrics
- **Similarity checking:** text manipulations (white on white, character replacement), similarity and citation detection, online and .pdf report, exclusions
- **Search capacity:** internet, institutional repository, student papers (global repository), scholarly publications
- **Formative:** unlimited submissions, grammar check, Draft Coach
- **Assignment-based workflow for those who don't have an LMS**
- **Integrations:** Plugin (Moodle), Canvas (CPF), LTI 1.1, LTI 1.3 (D2L, Canvas, Moodle), web-based SSO options
- 📌**Audience:** Instructors and students doing coursework

iThenticate

- **More future innovations, product enhancements and integrations**
- ✅ **Access management:** group settings to better manage access for matriculating students
- ✅ **Similarity checking:** text manipulations (white on white, character replacement), similarity and citation detection, online and .pdf report, exclusion options on the folder and document levels, side-by-side comparison, text-only report, automatic alerts for matching submissions
- ✅ **Search capacity:** internet, scholarly publications (including ProQuest dissertations and theses and Al Manhal repository), organization's indexed repository of research/scholarly works
- ✅ **Easy-to-use folder-based workflow with a folder sharing feature**
- ✅ **Integrations:** iThenticate API with flags for at-a-glance screening
- 📌

What does the new iThenticate include?

turnitin

iThenticate v1

- **Product in maintenance mode, no future innovations, or enhancements**
- **Outdated interface** which is not intuitive and does not provide the same experience as other Turnitin products
- **Folder-level settings & text-only views** not available in v2 but other new features in v2 provide an enhanced value proposition to customers
- **Does not address emerging challenges such as AI writing**
- **Similarity matching** does not include new enhancements such as flags & pre-print exclusions
- **Integrations:** iThenticate API which is complex and outdated; not supported by us
- **Security:** no local European data center; outdated account protection

iThenticate 2.0

- **Continuous product enhancements, feature innovations and integrations**
- **New interface:** refreshed and modernized design providing customers with a more intuitive and seamless experience
- **AI writing detection:** to help identify AI-generated content
- **Enhanced Similarity Report:** user-friendly, accessible design optimized for readability and simplicity
- **Improved collaboration:** ability to share folders with user groups boosts collaboration & productivity
- **Improved similarity matching:** new pre-print exclusions removes irrelevant sections of text and new Flags panel provides insight into text manipulations, further improving similarity matching
- **Upgraded admin functionalities:** improved user management, new admin paper lookup tool and detailed account usage statistics provides autonomy and simplifies account management for admins
- **Integrations:** flexible and easy-to-use Turnitin Core API integration allowing organizations to easily integrate iThenticate into their ecosystem
- **Security:** highly secure regional data centers in the US, the EU and APAC, and enhanced account security measures with updated password requirements to ensure protection of customer data

Bagaimana peneliti & penerbit menggunakan Ithenticate

Skenario umum peneliti:

- Inovasi cepat untuk melindungi dari tantangan yang muncul: Inovasi terus-menerus untuk mengatasi tantangan yang muncul seperti penulisan AI memberikan pengguna alat terbaru dan tercanggih untuk memastikan orisinalitas konten berisiko tinggi mereka.
- Pemeriksaan kesamaan yang kuat: Secara otomatis mengecualikan cetakan artikel dan makalah, sehingga menghilangkan kebutuhan akan penyelidikan manual dan membuat pemeriksaan kesamaan menjadi lebih kuat. Hemat waktu dengan mengidentifikasi teks tersembunyi dan karakter yang diganti dengan mudah melalui panel bendera.
- Kolaborasi yang efektif: Berbagi folder dengan kelompok pengguna, meningkatkan efektivitas kerja tim ketika mengevaluasi makalah berisiko tinggi, proposal hibah, esai penerimaan, dan penyerahan lainnya.
- Desain modern dan mudah diakses: Pengalaman pengguna yang intuitif dan efisien, serta antarmuka yang modern dan mudah diakses, menjadikan iThenticate baru sesuai dengan standar global terbaru.

Skenario umum penerbit:

- Jurnal yang lebih kecil memilih untuk memeriksa pelanggaran di awal proses dan menggunakannya sebagai filter
- Jurnal yang lebih besar dan mendapatkan banyak kiriman dapat memilih untuk memeriksa pada “fase penilaian editor.”

Perlu diingat:

Setelah penelitian dipublikasikan, sudah terlambat untuk memperbaiki masalah apa pun tanpa biaya dan kerusakan reputasi

Key capabilities at a glance

Key capability	Value
Modernized interface	A streamlined and intuitive user experience that's compliant with the latest global standards
Comprehensive similarity checking	Researchers & publishers can protect their reputation by ensuring their documents are free from plagiarism by checking them against iThenticate's comprehensive content database consisting of premium scholarly content from top publishers and an unparalleled internet repository
Integrated AI writing & paraphrasing detection	AI writing & paraphrasing detection is integrated within the Similarity Report and helps identify potential AI-generated and AI-paraphrased content, providing users with tools to protect themselves from this emerging challenge
Exclusion options	A broad range of exclusion options are available including preprints, custom sections, URLs, citations and quotes so that similarity scores are not artificially inflated. This saves time and allows for customizations that are embedded in the workflow
Document collaboration	A simple system of folders and folder sharing between user and user groups makes it easy for researchers and non-academic users to work with their peers and advisers
User management	Gives account administrators extensive, flexible, and simplified user management options that help save time & streamline their work
Private repository	Institutions and publishers can check submissions made to them against a collection of their own, highly relevant, organizational or industry written work, enabling them to capture misconduct and collusion cases more comprehensively
Data security	Data storage in highly secure regional data centers in the US, the EU and APAC, and enhanced account security measures to ensure protection of customer data at all times
